

Sulfex[®]
Since 1994
MATTRESS

Smile while Sleeping

ABOUT US

Founded in 1994 by a prominent NRI business group, Sulfex is a rapidly growing entity with diverse interests in rubberized coir mattresses, plywoods, and construction in India and trading activities in the Middle East.

Our two advanced manufacturing plants in Kerala boast an impressive 8000 metric tonne annual production capacity, making us a leader in rubberized coir mattresses and related products. With ISO 9001 and BIS certifications, we uphold global standards, including environmental care and no child labor. Sulfex mattresses and allied products excel in quality and value, offering optimal back support and comfort. Our commitment to quality has earned us the trust of discerning customers, including government bodies, premium hotels, and pilgrim centers.

We continue to invest in infrastructure and expansion, poised for a bright future in both domestic and international markets.

Designed to Dream

Energize your days with our mattresses,
starting from a great sleep!

QUALITY ASSURANCE

Sulfex group is ISO 9001 and BIS Certified, We always make sure that use 100% natural raw materials. With a competent and efficient team for conducting quality check, all the products and raw materials go through strict testing to ensure the strength, comfort, durability and various other verticals. With these certifications Sulfex, reaches out to the value conscious global markets as well.

Durability

How can I protect my Mattress ?

It is always better to use a bed cover to keep your mattress intact. It will also protect the mattress from stains. It is better to prevent kids from taking sweets and snacks to their bed to avoid ants and other insects. Change your sleeping positions frequently will also help you increase the life span of your mattress.

What if water spills on the Mattress?

Try to absorb maximum quantity of water using cloth and colourless absorbent paper. Place the mattress side wise with the wet side away from the wall and let it dry for 24 hours. You can also depend on sun light to dry the mattress.

What are the advantages of memory foam Mattress?

It is natural and ensure coolness as heat dissipates through the mattress away from the body. It also remembers the body posture of the person offering better support and optimal blood flow.

How to protect Mattress from moisture?

It is better to place silica gel packets underneath your mattress to absorb the moisture. It will avoid dusty and damp smell and avoid fungus. You can also try placing camphor balls under the mattress to prevent insects. The use of natural insecticides including like neem leaves and cloves is also advisable.

COIR MATTRESS

A natural coir mattress is a bedding option that stands out for its eco-friendly and sustainable qualities.

These mattresses are primarily composed of coir, a natural fiber extracted from coconut husks.

Coir offers several benefits, such as excellent ventilation, moisture resistance, and durability.

It is known for providing firm support, making it an ideal choice for individuals who prefer a sturdier sleeping surface. Moreover, natural coir mattresses are free from harmful chemicals and synthetic materials, making them a healthy choice for those with allergies or sensitivities.

Their breathability helps regulate body temperature during sleep, ensuring a comfortable and refreshing night's rest. Overall, natural coir mattresses are a fantastic choice for eco-conscious consumers looking for a comfortable and environmentally friendly bedding option.

SPRING MATTRESS

Experience unparalleled comfort and support with our exceptional range of spring mattresses, encompassing both Bonnell and pocketed spring technologies. Our Bonnell spring mattresses are designed to provide robust and lasting support, thanks to their interconnected coil system. This ensures even weight distribution, reducing pressure points and promoting a restful sleep. On the other hand, our pocketed spring mattresses excel in individualized support, as each coil is encased within its fabric pocket, allowing them to move independently. This feature adapts to your body's contours, delivering personalized comfort and minimizing motion transfer. Whether you opt for Bonnell or pocketed spring, you can trust our mattresses to enhance your sleep quality and well-being. Invest in the perfect harmony of support and comfort for a rejuvenating night's sleep.

How to Measure your Mattress Correctly

To measure your mattress correctly, gather a measuring tape, pen, and paper. Remove all bedding, then measure the width by extending the tape from one edge to the other, ensuring it's straight and taut. Measure the length by running the tape from the head to the foot of the mattress. Determine the thickness by measuring from one corner to the other or at various points along the edge for mattresses with varying thickness. Note any special features separately, such as pillow-tops. Record the measurements accurately and round them to the nearest inch or centimeter when needed, considering that mattress sizes may slightly differ among manufacturers and models.

HEAD OFFICE

Opp. Govt. College of Engineering,
IDP Andoor, Parassinikadavu, Kannur,
Kerala, India.

FACTORY

Nr. Kinfra Textile Park ,
Alakode Road, Thaliparamba,
Kannur, Kerala, India.

CORPORATE OFFICE

Pillar No136
Crescent Tower, Aluva
Ernakulam, Kerala, India.
